

Rapid Test Solutions

Kikkoman offers a wide range of rapid and effective technologies to optimize your food testing needs.

ATP Rapid Hygiene Monitoring Lumitester Smart & LuciPac A3

Higher sensitivity due to its ability to detect ATP+ADP+AMP.
*The holder and casing of LuciPac A3 is linked to 100% biomass-based polypropylene which is derived from renewable raw materials through the mass balance approach. (Premoistened swabs will switch in 2024.)

AOAC PTM Certified

LuciPac A3 Filter Assay

Rapidly detects microorganisms in liquids within 5 minutes, without training. For contamination control in cooling towers, water quality assurance, and industrial wastewater monitoring.

Prepared Media Plate for Microorganism Testing Easy Plate & Colony Counting System

Does not require a spreader, easy-to-use microbiological film-style media that simplifies your laboratory workflow.

The Colony Counting System automates colony counting on images Easy Plates, saving time and minimizing human error.

- MicroVal Certified
 - AOAC PTM Certified
 - NordVal Certified
- *Easy Plate YM-R, Easy Plate EB is under validation.

- 1 Easy Plate AC - Aerobic Bacteria
- 2 Easy Plate CC - Coliform
- 3 Easy Plate EC - *E. coli* / Coliform
- 4 Easy Plate SA - *S. aureus*
- 5 Easy Plate YM-R - Rapid type Yeast and Mold
- 6 Easy Plate EB - *Enterobacteriaceae*

Allergen Testing Allergeneye Immunochromatography

An effective, accurate and sensitive one-hour immunoassay for common allergens in food.

Histamine Assay Histamine Test & Histamine Check Swab

- 1 A rapid, portable, colorimetric screening test for histamine. 5 minutes screening with Histamine Check Swab.
- 2 A rapid enzymatic assay that is AOAC-validated, easy-to-use and provides a quantitative test result in less than 1 hr.

ATP-based microbial assay Lumitester C-110 & CheckLite Series

CheckLite series is based on the rapid, effective and proven ATP technology for bioburden detection.
