

Disinfecting/Antimicrobial Application Guide

Why Disinfect, Why Protox DES/Microcide?

Disinfecting can kill microorganisms on surfaces such as bacteria, viruses and spores, creating a healthy and infection-free environment for in the home, school, day care, hotels, restaurants, retail trades, sports and facilities, anywhere a healthy environment is required.

[Protox Des](#) is a broad-spectrum disinfectant, it has a very mild oxidising agent and can therefore be used on almost all surfaces that can withstand water and salt. [Protox Des](#) may be used on surfaces in connection with food, it does not bleach delicate surfaces such as upholstered furniture, carpets or clothes.

[Microcide](#) an economical heavy-duty cleaner is an antimicrobial/disinfectant, fungicide, viricide, sanitiser, mildew stat and deodoriser all-in-one. Best used for sewerage clean-ups, blood clean-ups, water damage restoration, control of bacteria, mould, fungi, algae and more. Great to fix bacteria in carpets, rugs & upholsteries. Add [Restore Solutions Wisp](#) to [Microcide](#) provide a pleasant fragrance.

How to:

Option 1 – Domestic Safe Application

(Always read [SDS](#) before use)

- Spray [Protox Des](#) onto soft goods with [Gloria Sprayer](#) and leave
- Spray [Protox Des](#) onto hard surfaces with [Gloria Sprayer](#) and leave for 5 minutes before wiping off with clean dry cloth.
- [Protox Des](#) can be fogged with a ULV Restore [Solutions Fogger](#).

Option 2 – Industrial Application

(Always read [SDS](#) before use and follow PPE guidelines)

- Restore Solutions [Microcide](#) can be sprayed with a [Gloria Sprayer](#)
- [Microcide](#) can be left on soft goods (Please note: this can remove stain guard protection).
- [Microcide](#) must be rinsed/wiped off hard surfaces after 5 minutes.
- [Microcide](#) can also be fogged with a [ULV Restore Solutions Fogger](#).

Outcome

A safe living / working environment free from bacteria, viruses and spore. Improved air quality, clean and sanitized.
