

## Hydroxyl Units

### Why Hydroxyl Units?

Hydroxyl units produce hydroxyls which remove bacteria & viruses from the air & surfaces. Hydroxyls directly destroy mould spores, the HQAir system treats infected areas by cutting off the food source for mould, and as a result there is nothing for mould to feed on.

### [Hydroxyl Professional Unit](#)

**The Most Powerful Indoor Air Purification and Sanitisation System for homes and offices, classrooms and areas up to 50sqm.**

- Each Machine will do up to 150 cubic meters.
