

XD-165L

LGR DEHUMIDIFIER

Low Grain Refrigerant

The **XPOWER XD-165L Low Grain Refrigerant (LGR) Dehumidifier** achieves maximum humidity control and water removal efficiency. This all new 'XXL' category unit is capable of removing up to 165 Pints/78 Litres per day @ AHAM (26.7°C, 60% RH) and 280 Pint/132 Litres per day at full saturation (32.2°C, 90% RH). The unit has an electronic display that assists in monitoring the temperature and humidity at the exhaust, as well as recording the total operating life of the dehumidifier. Lay flat ducting can be applied to the exhaust point of the dehumidifier with the dual ducting ring that is included on the unit to transport warm/dry air to where it is needed. Weighing 55kg with rugged wheels and telescoping handle, the ultra-mobile XD-165L gives you class leading LGR performance.

OTHER FEATURES:

- Digital display monitors current humidity and operating time
- Durable and rugged roto-mold housing
- Convenient power cord / drainage hose storage compartment
- Dual ducting adaptor exhaust capabilities
- Telescoping handle and large wheels for easy transportation
- Auto purge condensate pump with drainage hose automatically purges when full: no need to monitor collection tank levels
- Automatic speed control increases or decreases the fan speed based on the relative humidity and ambient temperature levels in the space requiring dehumidification

Model	XD-165L
Water Removal Capacity	165 pints / 78 L /day at AHAM (26.7°C, 60% RH) 280 pints / 132 L /day at Saturation (32.2°C, 90% RH)
Volts/Hertz	220-240V / 50Hz
Amps	5.9 A (low efficient Amps draw)
Rated Airflow	430 CFM
Speed	Automatic Speed Control
Filter Type	Stainless Steel Filter
Cord Length	7.6 metres
Drain Hose	12 metres
Operating Range	0.6° - 40.6°C / 20% RH
Unit Weight	55kg
Unit Size (LxWxH)	56 x 57 x 76cm
